

# Repealing Agendas for Future Growth Bill

I hereby propose that we repeal the Agendas for Future Growth law. It's a law that requires the Senate, the Secretary of Defence, the Secretary of the Interior, and the President to outline what's effectively a manifesto on tasks and principle goals for the Government. This is supposed to be done seven days after an election at the latest. I'm seeking to repeal this law not because I disagree with its purpose but rather because I don't think this has ever been done with the four elections since the law was passed. If a law isn't being followed and no-one is even noticing, then it shouldn't be on the law-books.

**Schedule 1:** Repeal the "[Creation of Icenian Agendas for Future Growth](#)" law.
